

Chap Measurement Form

Please Print this form, fill it out, and send it to us to insure the best fit for your chaps or chinks.

When measuring, wear the type of clothing you intend to be wearing with your chaps, especially your boots. Using a cloth tape or a thin steel tape is helpful. Pull tape snug, and make sure it is fairly level. You can use a string as a substitute and then measure the length from the string with a large tape or yardstick. Be as accurate as you can with your measurements, this will determine how well your chaps will fit.

- A) Hips: _____ Measure around your waist, just under your pants belt.
- B) Length: _____ Measure from the TOP of your regular belt to the floor. (For chinks, measure down to where you want the bottom of the fringe)
- C) Thigh: _____ Measure around the thigh at the largest point, usually just under the crotch.
- D) Knee: _____ Measure around the largest point of the knee joint. (Bend knee slightly)

- E) Calf: _____ Again around the largest point, this measurement is only required for shotgun chaps.
- F) Drop: _____ Measure the distance from where the waist measurement was taken to just under the crotch.
- G) Inseam: _____ From the crotch to the top of the boot heel. Usually 1 1/2" to 2" off the floor. This measurement is not required for chinks.
- H) To Knee: _____ Measure from where you took your length measurement down to the center of your knee. For chaps only.
- I) Mid Thigh: _____ Measure around your thigh about 6" below where you took your "THIGH" measurement. Again for chaps only.
